DETAIL ACTION

Response to Amendment

1. In responding to applicant's amendment filed 04/05/2004, claims 1, 3, 7, 8, 9, and 10 have been amended, claim 2 deleted, and claims 12-17 have been added.

REASON FOR ALLOWANCE

Allowable Subject Matter

- 2. The following is an examiner's statement of reasons for allowance Applicant's response filed on 04/05/2004 has been considered, with respect to claims 1, 12, and 15 device and the method thereof, the references of the record fail to teach or suggest:
- 1. a reflector external to said first resonant cavity delimiting the second resonant cavity thereinbetween, and selectively reflecting for an integer number N of optical frequencies, wherein said two opposed reflector members are not wavelength selective and delimit an amplifying first active section coupled to a phase tuning second active section, each of said two active sections connected to an electrical supply, said second active section having an effective group index that can be adjusted electro-optically as a function of an electrical voltage applied, said first and second active sections having dimensions such that a difference between optical frequencies of any two resonant modes of said first resonant cavity is never equal to a difference between optical frequencies of any two selectively reflected frequencies of said reflector, and second active section modifying an optical length of said first resonant cavity to provide for a selective coincidence of only one optical frequency between the resonant modes of said first resonant cavity and the selectively reflected frequencies of said reflector, wherein the difference

Application/Control Number: 10/079,875

Art Unit: 2828

between any two adjacent reflected optical frequencies is constant and the reflected optical frequencies are interleaved with consecutive optical frequencies of resonant modes.

12. a reflector external to said first resonant cavity delimiting the second resonant cavity thereinbetween, and selectively reflecting for an integer number N of optical frequencies, wherein said two opposed reflector members are not wavelength selective and delimit an amplifying first active section coupled to a phase tuning second active section, each of said two active sections connected to an electrical supply, said second active section having an effective group index that can be adjusted electro-optically as a function of an electrical voltage applied, said first and second active sections having dimensions such that a difference between optical frequencies of any two resonant modes of said first resonant cavity is never equal to a difference between optical frequencies of any two selectively reflected frequencies of said reflector, and second active section modifying an optical length of said first resonant cavity to provide for a selective coincidence of only one optical frequency between the resonant modes of said first resonant cavity and the selectively reflected frequencies of said reflector, wherein said waveguide includes a plurality of first sampled Bragg reflector gratings corresponding to a first Bragg wavelength and a plurality of second sampled Bragg reflector gratings corresponding to a second Bragg wavelength, wherein each sample of the first and second Bragg gratings, with the possible exception of a first or a last sample of the Bragg gratings, is disposed on the reflector in a repeated pattern comprising one sample of the first Bragg gratings, a first sample of a plurality of third gratings, one sample of the second Bragg gratings, and a second sample of the third gratings.

Application/Control Number: 10/079,875

Art Unit: 2828

3. Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Communication Information

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Tuan N Nguyen whose telephone number is (571) 272-1948. The

examiner can normally be reached on M-F: 7:30 - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Don Wong can be reached on (571) 272-1834. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9318 for regular

communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 306-3329.
